

### ◆ Description

Lower the handle to apply seal pressure to seal the tray.

- Photo eye included for printed film
- Stainless steel construction
- Cannot change tooling
- 110 Volt power
- Will run APET, CPET, PP, PET or PE trays
- No air required - all electric operation
- Film is die cut around tray
- Lidding film and trays available upon request

- Model: **PP-YTB-190**
- Maximum tray height: 140mm (5.5")
- Maximum tray length×width:  
sealing 1 at a time: 190×190 (7.5" x 7.5")  
sealing 2 at a time: 190×80 (7.5" x 3.15")  
sealing 4 at a time: 80×80 (3.15" x 3.15")
- Cycle time: 6 seconds
- Voltage: AC220V/AC110V
- Machine dimensions (mm): 310×400×580
- Machine dimensions (in): 12" x 15.7" x 23"
- Weight: ≈50kg (110 lbs)
- Max Film diameter : Φ220mm (8.6")
- Total power: ≈1.5kw

- Model: **PP-YTB-280**
- Maximum tray height: 140mm (5.5")
- Maximum tray length×width:  
sealing 1 at a time: 280×280 (11" x 11")  
sealing 2 at a time: 280×125 (11" x 4.92")  
sealing 4 at a time: 125×125 (4.9" x 4.9")
- Cycle time: 6 seconds
- Voltage: AC220V/AC110V
- Machine dimensions (mm): 390×400×580
- Machine dimensions (in): 15.3" x 15.75" x 22.8"
- Weight: ≈60kg (132 lbs)
- Max Film diameter : Φ220mm (8.6")
- Total power: ≈2.0kw
