## Stainless Steel Bottle Feeding and Unscrambling Turntables

- Level transition plate fits next to existing conveyor to facilitate easy transition from one conveyor to another.
- Large bottle loading platform 18" wide x 10" deep. Allows for large quantities of bottles to be pre-staged for feeding onto turntable.
- Easily adjust to different bottle diameters from ½" up to 4". Simply loosen 2 bolts and slide the adjustment plate in or out for different bottle width in seconds.
